## Professional Summary

I am a mid-level developer that manages a strong enthusiasm for code, with a healthy work/life balance. Interested in firms that have the ability to support and foster growth both inside and outside from the office.

## Technical Experience

*Web Development:* HTML5, CSS3, Javascript, jQuery, Bootstrap & Responsive Designs, Git, Ruby  
*Programming Skills:* Agile Methods, TDD, Paired Programming, API's, JSON & XML, OOP  
*Frameworks:* Rails, EmberJS, Padrino, Sinatra, Rack

## Professional Experience

### **Planet Argon – Portland, OR**

**09/2013 - present**

#### *Application Developer*

- Full-Stack Ruby on Rails developer managing all aspects of an application's lifecycle.
- Experience configuring hosting solutions involving multiple providers including AWS and Akamai.
- Worked on 15+ applications providing me the ability to become quickly productive in new applications.
- Experience with Javascript frameworks & toolsets including EmberJS.
- Direct client access has fostered productive and professional relationships that best suit the clients particular use-case and their application's unique scenario.
- Self-Driven: Small team structure has provided the opportunity to wear many hats and become a generalist with many skills.
- Experience creating applications from the ground level, as well as working to improve applications long into their lifecycle.

*My contributions can be found in applications such as:*

*[www.nikeinc.com](http://www.nikeinc.com), [www.converse.com](http://www.converse.com), [www.mcmenamens.com](http://www.mcmenamens.com), [www.opencityfreight.com](http://www.opencityfreight.com), [oceanscape.aquarium.org](http://oceanscape.aquarium.org), [www.pacglobal.com](http://www.pacglobal.com), [www.homezada.com](http://www.homezada.com), among others...*

### **Portland Code School – Portland, OR**

**06/2013 - 08/2013**

#### *Jr. Web Developer*

- 3 month intensive course building necessary skills for success as a Junior Developer.
- Practiced Agile methodology utilizing sprints, standups and retrospectives during/after projects.
- Learned to manage team development process utilizing Git version control.

## Education
